Personal Summary:

Hello, I am Suvidha, a dedicated B. Tech student majoring in Computer Science and Engineering. Currently maintaining a CGPA of 7.9, I specialize in C programming, Python, and Java. My primary focus is on creating captivating user interfaces to enhance the overall front-end experience.

Professional Experience:

In my recent 3-month internship in advanced data science, I undertook a transformative learning journey. Applying statistical analysis and machine learning techniques to real-world datasets not only honed my proficiency in Python and R but also equipped me with advanced skills in data preprocessing, feature engineering, and model optimization. Engaging in collaborative projects expanded my expertise in applying predictive modelling to diverse domains.

Goals:

I am excited to start a Python project with my team, combining our skills and ideas to make our vision a reality. I am eager to grow by exploring new technologies and getting hands-on experience through mentorship. Staying updated with tech trends is my passion, and I want to contribute to impactful projects. I believe mentorship is key to honing practical skills for success in the ever-changing tech world. My goal is to apply my knowledge to make a difference in real-world projects.
